

TIA KAVOUSI

Python developer

London, UK. | +447344017448 | tayebekavousi68@gmail.com | [LinkedIn](#) | [GitHub](#)

Full-stack Software Engineer with 2 years of experience, specializing in Python and Typescript to build scalable web applications and AI solutions. Passionate about leveraging LLMs to automate complex workflows.

SKILLS

- **Backend:** Python (FastAPI), SQL (Postgres), RESTful APIs
- **Frontend:** TypeScript, React, Next.js, Tailwind CSS
- **AI/ML:** RAG Systems and LLM Integration and Evaluation
- **DevOps & Tools:** AWS, Docker, CI/CD, Git, Linux, OpenTelemetry

PROFESSIONAL EXPERIENCE

PSS

April 2025 – January 2026

Full-stack software engineer

- Architected RESTful APIs using FastAPI, adhering to SOLID principles and design patterns to ensure implementing
- maintainable, high-performance services.
- Developed a RAG-based AI chatbot for property management audits, automating responses to complex document queries and reducing manual support tickets (FAQ).
- Integrated CopilotKit to enable natural language data exploration, allowing users to generate real-time dashboard visualizations and summaries directly from the result of their uploaded documents.
- Fine tuned a YOLO-based model for dental X-ray analysis (Tooth Number detection), including Image augmentation, class imbalance handling, fine-tuning, inference and evaluation, classifying the images with 81% precision.
- Built scalable, responsive frontend components with React, Next.js, and TypeScript.
- Implemented a centralized design system library using HeroUI, standardizing UI components across multiple projects.
- Automated E2E tests (76% coverage) using Playwright, integrating E2E functional and regression suites into CI/CD pipelines.

PureSoftware Ltd

January 2024 – April 2025

Python Developer

- Developed and maintained Python based web applications using Flask.
- Improved database (Postgres) queries performance by 30%.
- Implemented unit tests using Pytest.

BA THESIS

Sentiment Analysis:

The Impact of Code Review Sentiment on Pull Request Success: A Comparative Analysis of Selected Pull Requests on GitHub

- **Scope:** Collected and analyzed a dataset of 1,100 pull requests and 72,000+ PR comments to identify communication trends in 10 public repositories.
- **Methodology:** Fine-tuned three BERT base models for sentiment classification to evaluate how reviewer tone impacts collaborative outcomes.
- **Result:** Conducted logistic regression analysis to find a correlation between negative sentiment and PR success rates.

EDUCATION

IU International University of Applied Sciences, Germany

Bachelor of Software Development

April 2021 – November 2025

GPA 1.5 (UK First Class equivalent)
